

Engaging Science Students

Steve Maw

The Task

22 weeks to equip a diverse group of students with the skills, attitudes and subject content to thrive on their chosen degree progression

Background

Delivery:

- Lectures
- Labs
- Workshops
- Field visits

Biology Routes

Would be:

Medics – interested in human biology and disease

Food Scientists – food production, manufacture and consumption

Biology – biodiversity, conservation and ecology

Biochemistry – biochemistry and physiological pathways

Approach

Based around Student Managed Learning

Poster – microorganism of their choice

Bioethics essay – news clip from last 12 months

Create their own questions

Video clip – effect of lifestyle on health

Zoo Exhibit
